KOS.PRO Face Exfoliator

Not content with dominating the men's shaving market, King Of Shaves has branched out further with its new KOS.PRO range. Featuring everything from shampoo to a face wash, the mid-priced products have been exclusively used in salons before being made available to buy nationwide. KOS.PRO Face Exfoliator is designed to remove grease and unclog pores without causing irritation, making it an excellent choice for a twice-weekly face scrub. However, rubbing a little into your beard before a shave is the perfect prep for a close shave, freeing any ingrowing hairs from becoming trapped. **George Delius**
