Our Grooming Editor hunts out this week's best grooming gear

[<< See more >>](#)

**King Of Shaves K PRO range, from £8.99. For your nearest stockist call 0800 0838416 or log onto, [www.kospro.co.uk](http://www.kospro.co.uk)**

**The blurb says:** "Welcome to the next level in male grooming – a range of superlative quality, technologically advanced shave, skin and styling products brought to you by King Of Shaves. Each product has been specially engineered by our in house 'software' experts and tested by the industry's hardest taskmasters – the owners of leading barber shops and salons worldwide. The result? A range of professional, top-notch products designed to give you 'the world's best'."

**Our Grooming Editor says:** Anyone who uses King Of Shaves products will know that it's a brand famous for its high performance products, cutting edge technology and innovative formulations, so it's difficult to imagine how they could possibly top the stuff they already have. And yet, somehow, they've managed to. There are a whopping 13 products in this new superior 'Pro' range which can be found in selected salons across the country. The Pro Shampoo is great, as are the masculinely-scented styling products, but my favourite product from the range is the Pro Moisturiser which is rich and hydrating without being sticky or over-fragranced. The hexagonal packaging everything comes in is really cool too.

**Did you know..?** A King Of Shaves product is sold every seven seconds in the UK.
